## Temptation Island

### Succumb to a Simply Beautiful Island Hood from Sirius

New York, May 2005 – Inspired by the simplicity of fine cuisine, Sirius presents the SIU404, an Island-style vent hood with a clean simple shape that's free from complicated details.

Blending Italian product design with interior design, the SIU404 floats above the cooktop, encircling its surface with a halo of brilliant light, rendering this hood both sensible and sensational.

Enclosed within the seamless 14" cylinder lies a whisper-quiet, high performance 600 CFM motor that cleans and filters the air. A convenient wireless remote (particularly suitable for cooks with special needs) controls the 4 variable speed motor system as well as the 50W halogen lamp.

With a ten-minute 'delay-off' timer, heat overload sensor and removable dish-washer safe aluminum grease filter, the Sirius SIU404 is all about efficiency and cutting edge style. Optional ductless conversion is also available.

For more information on the Sirius collection of high-performance range hoods and the location of a Sirius dealer, call toll free 866-528-4987 or visit [www.siriushoods.com](http://www.siriushoods.com).
