

FOCUS Range Hoods/Ventilation

Wall Splash Above Range

Star Stainless Design's wall splashes can be placed above a range, enhancing the visual appeal of your kitchen, while offering a practical and contemporary option. The wall splashes are manufactured using 24ga., 304-grade stainless-steel, and are available in custom or standard boxed sizes. **MSRP is N/A. Star Stainless Design, 866-416-7827, www.starstainlessdesign.com**

Glass and Stainless-Steel Range Hood

Balancing presentation and performance, Sirius Range Hoods presents a glass and stainless range hood model SIU401-23 Island hood. The hand-fashioned clear glass screen provides an elegant profile, exposing a gently rounded silhouette that combines superbly with the sleek, seamless stainless-steel of the chimney, making this appliance a dynamic element in any kitchen installation. The SIU401-23 includes a powerful halogen light that provides brilliant illumination for the cooking worktop, dishwasher safe filter, delay off timers and heat overload sensors. Each unit is completed with a high-efficiency, whisper-quiet, variable-speed ventilation exhaust system that provides 600 CFM of power. A four-speed remote control ensures that adjusting the ventilation is just a touch away from wherever you are in your kitchen. **MSRP is N/A. Sirius Range Hoods, 866/528-4987, www.siriushoods.com**

Swivel Ventilation System

The VL 051 Telescopic Swivel Ventilation System from Gaggenau offers three power levels and features automatic height adjustment for use with a grilling surface or saucepans, and can be manually adjusted for any desired height in between. The ventilator arm rotates to 90 degrees in either direction, automatically retracts into the cooktop surface after use, and has an anti-trap sensor. The VL 051 is easy to clean—the metal filter can be placed in the dishwasher. **MSRP is N/A. Gaggenau, 800/828-9165, www.Gaggenau-usa.com**
